CONTENTS

VOLUME 119 · NUMBER 1 · JANUARY 2002

1 OLAF SPARRE ANDERSEN. Editorial

3 RAY A. CALDWELL, BARBARA R. GRUBB, ROBERT TARRAN, RICHARD C. BOUCHER, MICHAEL R. KNOWLES, and PIERRE M. BARKER. In vivo airway surface liquid Cl^- analysis with solid-state electrodes

15 ALEXANDER SHTIFMAN, CHRISTOPHER W. WARD, TAKESHI YAMAMOTO, JIANLI WANG, BETH OLBINSKI, HECTOR H. VALDIVIA, NORIAKI IKEMOTO, and MARTIN F. SCHNEIDER. Interdomain interactions within ryanodine receptors regulate Ca^{2+} spark frequency in skeletal muscle

33 RUI-MIN GU, YUAN WEI, HO-LIN JIANG, DAO-HONG LIN, HYACINTH STERLING, PETER BLOOM, MICHEAL BALAZY, and WEN-HUI WANG. K depletion enhances the extracellular Ca^{2+}-induced inhibition of the apical K channels in the mTAL of rat kidney

45 KWOKYIN HUI, GREGORY LIPKIND, HARRY A. FOZZARD, and ROBERT J. FRENCH. Electrostatic and steric contributions to block of the skeletal muscle sodium channel by μ-conotoxin

55 HAJIME HIRASAWA, RICHARD SHIELLS, and MASAHIRO YAMADA. A metabotropic glutamate receptor regulates transmitter release from cone presynaptic terminals in carp retinal slices

69 YONG G. WANG, ELENA N. DEDKOVA, SUSAN F. STEINBERG, LOTHAR A. BLATTER, and STEPHEN L. LIPSIUS. β_2-Adrenergic receptor signaling acts via NO release to mediate ACh-induced activation of ATP-sensitive K^+ current in cat atrial myocytes

83 BRAD S. ROTHBERG, KI SOON SHIN, PRASHANT S. PHALE, and GARY YELLEN. Voltage-controlled gating at the intracellular entrance to a hyperpolarization-activated cation channel

93 THEODOR V. BURDYGA and SUSAN WRAY. On the mechanisms whereby temperature affects excitation-contraction coupling in smooth muscle

105 LEHONG LI, XUEHUI GENG, and PETER DRAIN. Open state destabilization by ATP occupancy is mechanism speeding burst exit underlying K_{ATP} channel inhibition by ATP

VOLUME 119 · NUMBER 2 · FEBRUARY 2002

117 H. LEE SWEENEY, ERIKA L.F. HOLZBAUR, and E. MICHAEL OSTAP. The 55th Annual Meeting and Symposium of the Society of General Physiologists: Molecular motors

123 Paul F. Cranefield Award to David D. Friel

125 JAMES B. HURLEY. *Commentary:* Shedding light on adaptation

129 PETER D. CALVERT, VICTOR I. GOVARDOVSKII, VADIM Y. ARSHAVSKY, and CLINT L. MAKINO. Two temporal phases of light adaptation in retinal rods

147 VIRGINIJUS VALIUNAS. Biophysical properties of connexin-45 gap junction hemichannels studied in vertebrate cells

165 ANDREW L. HARRIS. *Commentary:* Voltage-sensing and substate rectification: Moving parts of connexin channels

171 FELIKSAS F. BUKAUSKAS, ANGELE BUKAUSKIENE, and VYTAS K. VERSELIS. Conductance and permeability of the residual state of connexin43 gap junction channels

187 ALBRECHT BERGNER and MICHAEL J. SANDERSON. Acetylcholine-induced calcium signaling and contraction of airway smooth muscle cells in lung slices

199 X. Fang, N. Fukuda, P. Barbry, C. Sartori, A.S. Verkman, and M.A. Matthay. Novel role for CFTR in fluid absorption from the distal airspaces of the lung

209 Acknowledgement

VOLUME 119 · NUMBER 3 · MARCH 2002

211 Meredith A. Albrecht, Stephen L. Colegrove, and David D. Friel. Differential regulation of ER Ca^{2+} uptake and release rates accounts for multiple modes of Ca^{2+}-induced Ca^{2+} release

235 Robert F. Rakowski, David C. Gadsby, and Paul De Weer. Single ion occupancy and steady-state gating of Na channels in squid giant axon

251 Alejandro M. Dopico, John V. Walsh Jr., and Joshua J. Singer. Natural bile acids and synthetic analogues modulate large conductance Ca^{2+}-activated K^+ (BK_{Ca}) channel activity in smooth muscle cells

275 Paula L. Smith and Gary Yellen. Fast and slow voltage sensor movements in HERG potassium channels

VOLUME 119 · NUMBER 4 · APRIL 2002

295 Torben Clausen. *Commentary:* Acute stimulation of Na/K pump by cardiac glycosides in the nanomolar range

297 Junyuan Gao, Randy S. Wymore, Yongli Wang, Glenn R. Gaudette, Irvin B. Krukenkamp, Ira S. Cohen, and Richard T. Mathias. Isoform-specific stimulation of cardiac Na/K pumps by nanomolar concentrations of glycosides

313 Stefan I. McDonough, Linda M. Boland, Isabelle M. Mintz, and Bruce P. Bean. Interactions among toxins that inhibit N-type and P-type calcium channels

329 Orna Zagoory, Alex Braiman, and Zvi Priel. The mechanism of ciliary stimulation by acetylcholine: roles of calcium, PKA, and PKG

341 Tsuyoshi Ohyama, Arturo Picones, and Juan I. Korenbrot. Voltage-dependence of ion permeation in cyclic GMP–gated ion channels is optimized for cell function in rod and cone photoreceptors

355 Pratip Mitra and Malcolm M. Slaughter. Mechanism of generation of spontaneous miniature outward currents (SMOCs) in retinal amacrine cells

373 Pratip Mitra and Malcolm M. Slaughter. Calcium-induced transitions between the spontaneous miniature outward and the transient outward currents in retinal amacrine cells

389 Correction

391 Correction

VOLUME 119 · NUMBER 5 · MAY 2002

393 Angelo Keramidas, Andrew J. Moorhouse, Kerrie D. Pierce, Peter R. Schofield, and Peter H. Barry Cation-selective mutations in the M2 domain of the inhibitory glycine receptor channel reveal determinants of ion-charge selectivity
